----------------------	---	----------------------------------	--------------------------	----------------------------------	--------------------------------------

12. Remarks:

Customer: DUNCAN AVIATION

Removed steering control and position feedback assembly from P/N 20030-101, S/N DCL029/96. Complied with visual inspection and found no defects. 96 month detailed inspection and 192 month restoration complied with on Duncan Aviation work order 1RNHC in accordance with Bombardier 604 AMM revision 64 dated July 11/2014. Final inspected.

Duncan Aviation certifies that the work specified in Blocks 11 and 12 was performed IAW EASA Implementation Rule part 145 approval, and with respect to that work, the aircraft component is considered ready for release to service under EASA approval number EASA.145.4392. Certificate Number JGVR194F.

All EASA/FAA Airworthiness Directives are the responsibility of the installer.

No current U.S. Airworthiness Directives apply.

Technician: Gregory A Thimman

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

Statements in blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
