12. Remarks:

Customer: DUNCAN AVIATION

Disassembled, cleaned and stripped as necessary. Visually inspected piston head. No defects noted. Overhauled per LEARJET 35/36 Maintenance Manual, Revision A4, dated 03/02/2015.

Duncan Aviation certifies that the work specified in Blocks 11 and 12 was performed IAW EASA Implementation Rule part 145 approval, and with respect to that work, the aircraft component is considered ready for release to service under EASA approval number EASA.145.4392.

All EASA/FAA Airworthiness Directives are the responsibility of the installer.  
No current U.S. Airworthiness Directives apply.  
Technician: Scott F Lau

**User/Installer Responsibilities**

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

Statements in blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
