<small>         FAA Form 8130-3 (02-14) <b>User/ Installer Responsibilities</b> <small>Installer must cross check eligibility with applicable technical data</small> <small>NSN: 0052-00-012-9005</small>          It is important to understand that the existence of this document alone does not automatically constitute authority to install the engine/propeller/article. Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s) article(s) from the airworthiness authority of the country specified in Block 1. Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulation by the user/installer before the aircraft may be flown.          Details of Work Performed - Work Order Attached <small>8130 Return to Service Form, Authorized Sign: 43.7c / 145.157 145.213(a) (b) Attached</small> </small>
